 Hyderabad

PROFILE SUMMARY

Software developer with 5+ years of experience in designing and developing both backend services and frontend applications. Proficient in Node.js, Express, AWS Lambda, MySQL, and MongoDB for backend development, and React.js, Redux, JavaScript, HTML, and CSS for frontend development. Experienced in building secure REST APIs, serverless functions, dynamic filtering, pagination, and optimized SQL queries, along with developing clean and responsive UI components.

SKILLS

Frontend & Backend Technologies: JavaScript (ES6+), TypeScript, React.js, Redux, React Router, HTML5, CSS3, API integrations Node.js, Express.js, Java (8/11), Spring Boot, REST APIs, JWT Authentication, Microservices Architecture, Event-Driven Systems	Cloud & Serverless & Databases: AWS Lambda, API Gateway, CloudWatch, S3, SQS, Cognito, DynamoDB, RDS, Serverless Architecture, Terraform, CloudFormation	Tools & DevOps: Git, GitHub, GitHub Actions, CI/CD Pipelines, Jest, Cypress, Playwright, Postman, JIRA
AI & Chatbot : OpenAI API, Chatbot Integration, Gen AI, Claude.		

WORK EXPERIENCE

Perimattic pvt limited Node.js developer - Developed scalable serverless microservices using Node.js, AWS Lambda, API Gateway, and DynamoDB, improving backend response efficiency and reducing infrastructure overhead. - Implemented CI/CD deployment pipelines using GitHub Actions and automated build workflows. - Designed secure REST APIs with JWT authentication, pagination, filtering, and reusable middleware components for scalable cloud-native applications. - Worked with MySQL and DynamoDB, optimizing queries and improving data performance. - Used AWS services including RDS, S3, CloudWatch, and Secrets Manager for secure and scalable backend solutions. - Handled debugging, refactoring, and ensured code quality with robust error handling. - Implemented reusable modules and structured backend architecture for maintainability and scalability.	03/2023 – 10/2024
Keolis Hyderabad Mass Rapid Transit System Private Limited Trainee-Train Operator - Operated train control systems and onboard panels, ensuring safe and reliable service. - Monitored traction, braking, door control, and signaling systems during operations. - Performed pre- and post-operation checks on electrical/electronic panels and safety systems. - Detected and reported system faults, coordinating with OCC and maintenance teams. - Maintained system logs and incident reports as per safety standards.	12/2021 – 03/2022

Software Developer

- Developed reusable and responsive UI components using React.js, Redux, JavaScript, and TypeScript for scalable enterprise applications.
- Contributed to microservices-based backend systems using Java, Spring Boot, and Node.js with REST API integrations.
- Assisted in building and maintaining RESTful APIs using Node.js and collaborated on Java Spring Boot services.
- Integrated React frontend with backend services (Node.js & Spring Boot) to enable seamless data flow and efficient client-server communication.
- Gained foundational experience working with Java-based modules and understanding backend integration within full-stack applications.
- Optimized database queries and improved application performance using **MySQL** and **MongoDB**.
- Collaborated with cross-functional teams in Agile/Scrum environments, actively participating in sprint planning, development, and feature delivery.

PROJECTS

Bus Booking System

React.js, Redux, Node.js/Express.js, MySQL

A web platform that allows users to search, book, and manage intercity bus tickets. Includes admin modules for seat management, operator details, and real-time booking updates.

Responsibilities: Built UI screens, integrated APIs, implemented booking logic, optimized MySQL queries, and improved overall system performance.

Subscription Management Platform

MERN, JWT

A scalable platform for managing user subscriptions, billing cycles, renewals, and plan upgrades for SaaS products.

Responsibilities: Documented APIs using Swagger/OpenAPI and followed API governance and versioning practices. Implemented subscription APIs, integrated JWT authentication, built role-based flows, and optimized MongoDB queries.

Airport Baggage Tracking System

Node.js, Express.js, AWS API Gateway, DynamoDB

An IoT-enabled solution allowing passengers and airport staff to track baggage locations in real time, reducing lost luggage incidents.

Responsibilities: Developed backend services, integrated DynamoDB, implemented status updates, and supported real-time data retrieval flows.

Dental App

React.js, Java, Spring Boot, REST APIs, MongoDB, JWT

A web application for booking dental appointments, assigning doctors, and enabling admin-patient communication.

Responsibilities: Developed appointment and admin screens using React.js, Integrated frontend with backend REST APIs built using Java and Spring Boot. Implemented JWT authentication and handled data storage and retrieval using MongoDB.

EDUCATION

Bachelor of Engineering

OSMANIA UNIVERSITY

2015 – 2018

Diploma.

JN GOVT. UNIVERSITY

2012 – 2015
